

[>>>Click here for a video walkthrough](#)

The "From 0 to 99% Bitcoin Course" is a (group) coaching program where we provide you, as a budding Bitcoin enthusiast, with everything you need to not only securely start saving, investing, or holding Bitcoin but ultimately educate you to become a professional who can live fully financially sovereign on a Bitcoin standard.

## **How & what we will concretely help you with:**

### **About the trainer..**

Marc van Versendaal has been deeply involved in Bitcoin day and night for over 7+ years and, for the past 2.5 years, has established a (paid) community focused on Bitcoin and Financial education. Marc is also the host of the Dutch podcast "The Marc My Words Show," which regularly features prominent figures from the Bitcoin community. During all this time, literally every conceivable question about storing, sending, and receiving Bitcoin has come up, been researched, and answered. Additionally, Marc regularly provides training at companies, where topics like "financial sovereignty," "privacy," and "safeguarding Bitcoin for the future" are high on the agenda.

## **What you will gain?**

- You don't have to figure everything out about Bitcoin on your own, instead do it together
- Any "beginner's fear" will be completely eliminated because Marc does all the work for you
- Even with very little time, you will be fully set for life in just a few weeks
- Your ability to assess what holds value will increase exponentially
- You'll learn directly how to buy, send, and store Bitcoin safely and professionally.
- Without any technical or financial background, you'll reach a 99% knowledge level after 8 sessions
- (Bonus) One year of updates on everything related to Bitcoin, Gold, Crypto, Stocks, and the challenges our financial system will bring
- (Bonus) Membership in an energetic community where like-minded people share their passion and ideas for financial freedom and sovereignty.

# What will you learn?

Bitcoin comprises various facets that are all equally important to continue approaching and utilizing correctly in the future. The four main facets are:

1. **Technical**
2. **Economic**
3. **Socio-Political/Philosophical**
4. **Practical\***

*\*During this training, the last facet (Practical) will receive the most attention by far.*

**Technical:** Understanding how Bitcoin works and its technical structure helps you better explain to yourself why it has the properties it does and how you can leverage them to your advantage. It's also important to know how Bitcoin came into existence.

**Economic:** Bitcoin is a new form of money. To assess the value of this form of money, it's useful to know what money is, where it comes from, and why money itself has been such an important invention. Understanding what economic value is and what role Bitcoin can play in it is crucial in your Bitcoin journey to avoid making mistakes in the future.

**Socio-Political:** Here, we focus on the societal impact, current regulation, acceptance, and future expectations. It's crucial to consider potential threats so you can use Bitcoin correctly.

**Practical:** As mentioned, this area receives by far the most attention because it's repeatedly shown that people need to start with Bitcoin as soon as possible in order to better understand it. So, safely and professionally buying, sending, and storing Bitcoin forms the foundation. Don't think you can skip this phase because it turned out that 99% of our participants have NOT been doing this correctly before we met them. By addressing this properly once or twice, we can then scale up our safety, privacy, and financial sovereignty. In the beginning, we lay the foundation!

# What does the program look like?

## Content:

### Session 1:

- Discussing everyone's objectives
- Buying Bitcoin on a centralized Crypto Exchange & a centralized Bitcoin Exchange.
- Buying Bitcoin on a peer-to-peer Exchange.
- Setting up a private Bitcoin (hot) wallet structure.
